- Snap-In Device Connectors
- Pluggable PCB Connectors
- Distribution Connectors
- Cable Assemblies
- Flat Cable Systems
- Distribution Boxes
- Accessories and Tools

WAGO Automation Technology

Edition 2023/1

WAGO Automation Technology

- Cloud Solutions, Software Applications
- Engineering Software, Runtime Software, Mobile Software (Apps)
- Web Panels, Visu Panels und Control Panels
- Edge Controllers, Edge Computers
- Controllers
- I/O Systems
- Industrial Switches
- Radio Technology
- Sensor/Actuator Boxes
- Accessories and Tools

WAGO Interface Electronics

Edition 2023/1

WAGO Interface Electronics

- Coupler Relays
- Solid-State Relays
- Signal Conditioners and Isolation Amplifiers
- Energy Measurement Technology
- System Wiring
- Component Modules
- Empty Housing
- Protective Devices and Protective Electronics
- Accessories and Tools

WAGO Power Supply Systems

Edition 2023/1

WAGO Power Supply Systems

- Power Supplies; 1-Phase
- Power Supplies; 3-Phase
- Special Supplies
- Circuit Protection
- DC/DC Converters
- UPS-Charger and Controllers and Capacitive Buffer Modules
- Redundancy Modules
- Energy Measurement Technology
- Potential Distribution
- Accessories and Tools

WAGO Marking

- Plain Products
- Marker Carries

About This Catalog

Our digital catalogs provide several search and navigation features to help you quickly find the information you need. This page introduces the key functions of the catalog.

Searching the Catalog

To search for specific terms within the catalog, follow these steps:

- Open the search dialog via **Edit > Find** or by clicking the **magnifying glass icon**. Alternatively, use the **Ctrl + F** keyboard shortcut.
- Enter your search term in the search field.
- Click **Next** to move to the next search result.

Navigating with Bookmarks

This PDF includes bookmarks to help you quickly and easily find specific sections. With a single click, you can jump directly to a chapter in the catalog.

- Open the bookmark panel by clicking the **bookmark icon**.
- To navigate to a chapter, click the relevant bookmark in the bookmark panel. The corresponding catalog page will then be displayed.

Navigating with the Table of Contents

Our table of contents includes clickable page numbers, allowing you to jump directly to the corresponding catalog page.

WAGO Marking Accessories

	Page
 WAGO Thermal Transfer Smart Printer	5
 Digital Engineering with WAGO	21
 WAGO Products for the WAGO Thermal Transfer Smart Printer	29
 Printed WAGO Products	49
 Plain WAGO Products	75
 WAGO Marker Carriers	83
 Index	101

You can also find additional clickable page numbers in the selection guides and the item number index.

Links

To help you access additional information easily, this catalog includes links to various websites. These links may provide further product details, installation notes or quick access to important documents such as data sheets.

One example is our **item numbers**, which contain links to the corresponding product detail pages on our website. Simply click an item number to open the relevant product detail page.

You can identify links in this catalog by the pre-sence of a URL in the link text (e.g., www.wago.com). In most cases, links are also underlined for easy recognition.

WINSTA® – A Complete Series Perfects the System

The WINSTA® Pluggable Connection System

is the electrical interface that links power supply and distribution to electrical loads (e.g., lights) and encompasses data processing (bus lines in building automation).

WINSTA® MINI

WINSTA® MIDI

WINSTA® MIDI Linect®

WINSTA® MAXI

WINSTA® RD

WINSTA® KNX

WINSTA® – The Pluggable Connection System

Plug into Power!

Even though the life cycle of a building stresses longevity, construction times are ever shorter and, particularly for functional buildings, operations are often subjected to continual reconstruction and relocation. Conditions within the construction industry show similar dynamic change: Overall construction volume is rising, so the order books are nicely filled. Yet at the same time, that industry struggles with a shortage of qualified workers. The **WINSTA®** Pluggable Connection System is the answer because speed, flexibility and expandability are becoming increasingly more important as integral keys to the long-term viability of buildings.

Planning

- End-to-end, application-oriented solutions from supply to load
- Integration of bus systems like DALI, SMI or KNX possible
- Decentralize energy distribution by integrating individually manufactured **WINSTA**® and system distribution boxes
- International approvals, along with our numerous successfully concluded building projects and references from the shipbuilding, transport and machinery/plant engineering areas, confirm high product quality.

Setup/Installation

- Evident time savings for the installer on the construction site thanks to Plug & Play connections.
- Pre-assembled cables and distribution components mean distribution connectors are easily inserted, so there is no more laborious wiring in junction boxes.
- Mechanical coding and color identification enable clear assignment to the power circuit for secure protection against mismatching – especially when used with the optional individual printing.

Utilization

- Simple, swift change for newly planned room divisions or extensions
- Numerous system partners bring future security
- Locking latches for solid, secure component connections

Maintenance

- The **WINSTA**® Pluggable Connection System is based on maintenance-free spring pressure connection technology.
- **WINSTA**® MIDI features thoughtfully designed test ports that enable testing when plugged in.
- Color coding, e.g., for plugs or distribution connectors, enables fast power circuit identification.

Conversion/Modernization

- The electrical installation can be flexibly reconfigured or extended, adapting readily to individual requirements.
- Energy-efficient, sustainable products for room automation, for example, can be integrated into a **WINSTA**® installation for renovations or other conversions.
- Minimized downtimes for maintenance processes (e.g., for exchanging lights).

Perfectly Plugged Applications

WINSTA® Building Applications

Every family within the **WINSTA®** system features an extremely broad product portfolio to meet the power supply and signal transmission requirements of modern buildings. Individual components including plugs, sockets, distribution connectors, cable assemblies and boxes with pluggable outputs provide all you need for fast and easy electrical installations.

Additionally, the **WINSTA®** MINI and MIDI families with coding B offer various mechanical and optical coding options for clearly identifying different circuits, while allowing bus signals to be distributed via pluggable connections.

Raised-Floor Box

- IDC flat cables provide power supplies to raised-floor boxes.
- For each type of supply, a flat cable line is installed in the raised floor and fed via supply modules.
- Tap-off is performed via a cable assembly that is protected against mismatching.
- Floor boxes come with integrated snap-in connectors.

Cable Duct

- Power supply distribution to a 230 V mains is performed using a pre-assembled **WINSTA®** Distribution Box.
- Power outputs are plugged into trunking outlets via pre-assembled interconnecting cables with integrated **WINSTA®** Plugs and Sockets.

iStock.com/Johnny Greig

Sunblind Control

- A connecting cable supplies the **WINSTA®** Distribution Box for sunblind control.
- The sunblinds can also be operated via switches, as a user may expect.
- The distribution box connectors are protected against mismatching.
- The application is pre-assembled to save installation time and expedite system expansion.

Lighting

- The ceiling lights are connected to the distribution box via Linect® T-Connectors and **WINSTA®** Cable Assemblies.
- The circuit is flexible, quick to set up and can readily adapt to new requirements using the pluggable connection system.
- Linect® lights can be installed and removed just as quickly.

Perfectly Plugged Applications

WINSTA® Applications in Other Industries

Ships

Pluggable connection of smoke detectors, balcony door contacts, speakers and lights expedite electrical installation.

@gilles lougassi/Fotolia.com

RVs

Electric power and lighting for the interior – benefit from fast, safe and faultless installation.

@06photo/Fotolia.com

Trains

Plug & Play components support on-schedule completion and quick component replacement using pluggable outlets, displays, internal circuits, door contacts, speakers and lighting.

iStock.com/ fallbrook

iStock.com/kirza

Elevators

Simplified installation and maintenance thanks to pluggable connections for electric power and lighting in the compartments

@Photocreo Bednarek/Fotolia.com

Shops and Trade Shows

Flexible installation that optimally provides electricity and lighting to temporary structures, or those that are frequently modified

@maho/fotolia.com

Device Connection at Home

Ignition fans for pellet heating, connection of room control devices, electrical and lighting installation for integrated room systems

Devices and systems in homes and other private buildings have to be started and disconnected quickly and easily. This can be done at any time via touch-proof **WINSTA®** Pluggable Connectors.

Perfectly Plugged Applications

WINSTA® Applications in Other Industries

Retail Centers

Within electrical and lighting installations in consumer electronics stores, home improvement centers, supermarkets and other high-traffic environments, plug-gable electrical installation is the gold standard.

@Photocreo Bednarek/Fotolia.com

Device Connection for Industrial Applications

Control systems, single-room controllers, presence detectors, empty bottle return machines and more

Manufacturers of industrial devices and systems are faced with a number of challenges. **WINSTA®** snap-in device connection permits fast, safe and error-free commissioning.

Customer Applications

Lanfer Automation

The company completely renovated its headquarters, targeting greater energy efficiency through innovative automation technology. The installation yielded additional benefits, because using the bus technology

meant no multiple lines had to be laid. As an additional benefit, **WINSTA®** simplified the connections between systems and devices

Zinser Fashion House

The Zinser Fashion House was completely modernized in a very short time, without interrupting operations. Instead of individually wiring 2000 lights per floor, only

30 to 35 **WINSTA®** Boxes had to be wired in each story, leaving only the lights to be plugged in.

Herford Hospital

The clinic decided to use **WINSTA®** for the electrical wiring of the new, one- and two-bed patient rooms. For the installation of sockets on patient beds, a concept that enabled simple pre-assembly was designed. The corridor lighting in the hospital was implemented with

the pluggable connection system, resulting in 70% less effort and 30% lower costs.

Münster Municipal Theater

The Münster municipal theater was the first theater constructed in Germany after World War II. As part of its renovation, the illuminated seat numbering was modernized using **WINSTA®** Pluggable Connectors.

The emergency lighting was also revamped using **WINSTA® MINI**. The results simply sparkle.

WINSTA® – System Partners

Pluggable, End-to-End Design and Installation

The core advantage of the **WINSTA®** Pluggable Connection System is in the time it saves. Electrical designers save time, especially when they can quickly and neatly create complete electrical plans the installers can use to build complete electrical systems on the construction site. The job is done on time and without a hitch!

With **WINSTA®** and the connected system partners, a coherent and consistent electrical design is seamlessly implemented and realized from supply to the "last mile"; that is, the interfaces to the fixed installation, such as lights or sockets.

- All system partners maintain catalog articles with **WINSTA®** Pluggable Connection Technology.
- The system partner program covers all building installation interfaces, right to the end user.
- Manufacturers that carry the **WINSTA®** system partner logo equip their complementary products with the original WAGO Connection Technology and WAGO Pluggable Connectors.

Please feel free to contact us if you would like to have further information about our local **WINSTA®** system partners!

Lighting Fixtures

- Major time savings, since the plugs are already mounted at the factory.
- Also available for LED lights

Switches/Socket/Cable Ducts

- As one example, with **WINSTA**®, cable duct elements can be preassembled by the meter and installed on the construction site with just a few easy steps.

Underfloor

- Our system partners' underfloor boxes are available with either a handy, short connecting cable or a snap-in plug.

Workstation

- Workplace installations must be flexible – with **WINSTA**®, the ideal connections are a given.
- **WINSTA**® system partners offer a comprehensive range of functional, design-optimized complementary products.

WINSTA® in the Context of the Construction Product Regulation (CPR)

Background

Cables that are permanently installed in structures fall under the European CPR. They are classified into uniform fire classes according to their reaction to fire. The requirements are described in the harmonized standard hEN 50575:2014. Device connection cables that are directly connected to a load are an exception. All other cables must bear a CE conformance mark according to the CPR and a declaration of performance.

What does this mean for the **WINSTA®** Pluggable Connection System?

WAGO supplies cable assemblies within the **WINSTA®** product range. These cable assemblies are construction product-compliant, as they are designed according to standards for permanent installation in buildings, but are not covered by a uniform standard under the CPR. The scope of hEN 50575 only includes raw cables, not finished cables or cable assemblies. Thus, WAGO itself cannot issue any CE marking according to the CPR or declaration of performance!

What safety does WAGO offer in the event of fire?

The numbers from various statistics clearly show that one of the most common causes of death in fires is exposure to toxic gases and smoke. To counteract this, we have offered halogen-free cable types for the **WINSTA®** System for some time.

Always on the safe side – with **WINSTA®**!

The cables in the catalog range now already meet the requirements of the CPR and have been tested accordingly. Articles of higher fire classes (B2_{ca} and C_{ca}) are available on our E-Shop.

FAQ – Planning

Which room installation applications can be realized with the **WINSTA®** plug-in convenience?

WINSTA® means versatility for the widest range of applications. With the diverse product types, it is possible to install the energy supply for lights with widely varying switching types through cable ducts or underfloor systems via floor boxes, as well as dimming and shade control via pluggable installation connectors. Integrating bus systems such as DALI for dimming functions or SMI to control shading is uncomplicated; the same applies to the necessary sensors.

Is **WINSTA®** intended for applications in open or easily accessible areas?

Specialty products are available for this application (see page 175).

How flexible is the **WINSTA®** System when it comes to design/installation changes?

In functional buildings, modules can be added to the **WINSTA®** System at any time. If the intended room use changes, the installation is adapted or retrofitted quickly and error-free. With Plug & Play connection, both pre-assembled wiring and loads can be exchanged with just a few deft moves. All **WINSTA®** products can be reused to conserve resources.

Is the **WINSTA®** System maintenance-free?

Of course; the **WINSTA®** Pluggable Connection System is based on maintenance-free spring pressure connection technology. Many of the components feature Push-in CAGE CLAMP® for conductor terminations; thus, for example, even solid conductors can be simply pushed into unit.

Does WAGO recommend which coding and color to use for which application?

Due to the different applications, WAGO recommends using specific mechanical codings and colors:

Application	Coding	Connector Color
General network applications	A	Black, white
EPD or UPS applications	P	Red
Controlled lighting, DALI	I	Blue
Emergency power applications	L	Dark gray
Switch function	S	Brown
Control or other mains applications	B	Gray
Controlled shading/dimming; e.g., via SMI	B	Pink
Low voltages	B	Light green

Are distribution boxes with WINSTA® components available?

Yes. WAGO offers a variety of distribution boxes with different functions, like DALI Bus, KNX applications, sunblind control and more – completely ready for connection with WINSTA® Pluggable Connectors.

Where can WINSTA® be installed?

Essentially, the provisions outlined in VDE 0100 must always be observed. Pluggable installation connectors like WINSTA®, approved per IEC 61535, find use in prefabricated buildings, hollow spaces such as double floors or suspended ceilings; cable carrying, routing or ducting systems; in showrooms, separation walls and all similar applications.

FAQ – Service

How does WAGO support me during the design of building installation and automation?

WAGO's project service offers a very high level of support to help you through even the most complex and demanding installations. You can contact the project service by email under: info.projektplanung.de@wago.com.

Are there planning templates to get started?

WAGO has compiled planning examples for some applications; they are presented in our planning brochure with an appropriate parts list (www.wago.com/winsta). With **WINSTA**®, these resources provide solid orientation that can be easily adapted to the individual project requirements – especially in the start phase.

FAQ – Installation

Is the **WINSTA**® Connection System truly a universal solution for building applications that allows devices with conventional field-wiring terminal blocks to be integrated into the installation?

In addition to cooperation with system partners who have access to their products via a direct **WINSTA**® interface, the **WINSTA**® System offers flexible and independent solutions such as connecting cables with open cable ends for pre-assembly on site. This means devices and loads can always be integrated into a **WINSTA**® installation.

What key advantages does **WINSTA**® offer for wiring?

Using the **WINSTA**® Pluggable Connection System cuts on-site connection time for installers to an absolute minimum. Thus, whenever a project calls for electrical installation, the wiring is simple, fast and on time, every time. **WINSTA**® also offers a multitude of mechanical codings and colors to protect against mismatching that virtually eliminate installation errors.

Who is permitted to install products from the **WINSTA**® Series on the construction site?

Only qualified electricians or appropriately instructed personnel may install pluggable installation connectors from the **WINSTA**® Series.

What needs to be considered for the transition from NYM cables for permanent installation to pluggable installation using flexible cables?

Flexible cables must be protected against excessive loads from tension, pressure, abrasion, twisting and kinking, particularly at device inlets and the transition point to the fixed installation. With **WINSTA**® Connectors, the transition point from NYM to **WINSTA**® can be defined and connected directly on site. This transition area must be correspondingly secured and protected from excessive bending stress. In addition, all terminals must be protected against shear and tensile stress.

FAQ – Security

How does **WINSTA**® accommodate differentiating/identifying individual power circuits?

Of course, flexible marking is part of a flexible connector system. This is why **WINSTA**® also offers custom solutions. Components with coding B from the **WINSTA**® MINI and **WINSTA**® MIDI families can be variably printed, to explicitly identify the specific power circuit they are assigned to. With clever accessories, further possibilities emerge.

Are the pluggable connectors secure and protected against accidental disconnection?

All products intended for permanent installation (e.g., distribution boxes, snap-in variants, PCB variants) are fitted with locking latches at the factory, so every plugged connection is securely locked. Locking latches can be attached to pre-assembled cables for "flying leads" at any time.

Is **WINSTA**® suitable for outdoor installations?

The **WINSTA**® System is approved up to protection class IP20; thus, **WINSTA**® shall not be used for outdoor installations.

Is the **WINSTA**® System protected against accidental contact?

All components of the **WINSTA**® System are protected against accidental contact, providing maximum safety.

FAQ – Regulations, Standards and Guidelines

To which regulations must I orient myself for installations with **WINSTA**®?

WINSTA® is primarily approved per IEC 61535 (VDE 0606-200) – the product standard for pluggable installation connectors intended for permanent connection in mounted installations. When installing **WINSTA**® products, the DIN VDE 0100 specifications must be followed.

Can **WINSTA**® be used in low-voltage range applications?

Compliance of **WINSTA**® products with the low-voltage directive is verified by the CE approval.

What must be accounted for when connecting a cable with reduced cross section to an underfloor box (e.g., via IDC tap-off module)?

The minimum cable cross section must be adapted to the connected load. More protection measures are only required if the cable with the reduced cross section is longer than 3 m; see VDE 0100 – 430.

Can two electrical circuits (even those with different voltages) be routed in one connector/cable?

According to VDE 0100 Part 520, this is acceptable when the connector, or all of the wire insulation present in the cable line is rated for the maximum voltage applied.

What needs to be considered for an installation requiring increased fire protection?

When using pluggable connector systems, the conduit selected has a significant impact on building protection, thus safeguarding the inhabitants and users. Cables and conduits fall under the Construction Product Regulation (CPR). Their performance in the event of fire is described by the fire class feature. In the **WINSTA**® product range, WAGO also carries cables suited for higher fire classes (B2_{ca} and C_{ca}) that are available in our eShop.

WAGO Pluggable Connection System *WINSTA*® MINI

WAGO Pluggable Connection System WINSTA® MINI ▶ 890, 891 Series
1.5 mm² / 16 A

- Note:**
- Installation connectors are designed for connection and disconnection while not under load.
 - There is no hazard-inducing interchangeability with systems based on IEC 60309, IEC 60320, IEC 60906 and with national connector and socket systems.
 - Compliance with the standards (IEC 61535) does not guarantee hazard-preventing, non-interchangeability with installation connector systems from various manufacturers.
 - Installation connector systems are not a substitute for residential connector/socket systems.
 - B-Coded components from the WINSTA® MINI series are designed for specialty applications (e.g., measurement, control and regulation technology) and certified per DIN EN 61984.
 - WINSTA® MINI Connectors are not intended for installation in open or easily accessible areas.

WINSTA® MINI ► 890, 891 Series

Installation

1

1. Strip length, outer insulation = x mm ❶
2. Strip length = 9 mm
3. Extended ground conductor = 8 mm

To terminate fine-stranded conductors, open the clamping unit via screwdriver (2.5 mm blade width) and insert a stripped conductor until it hits backstop. Terminate solid conductors by simply pushing them in.

Latch wired connector onto the base of the strain relief housing.

To terminate fine-stranded conductors, open clamping units via operating tool (890-382) and insert stripped conductors until they hit backstop. Terminate solid conductors by simply pushing them in.

To terminate fine-stranded conductors, open clamping units via operating tool (890-383) and insert stripped conductors until they hit backstop. Terminate solid conductors by simply pushing them in.

Secure the mounting plate via pins.

The distribution connectors snap together when attached to the mounting plate.

All connectors for mounted installations (snap-in versions, pluggable PCB connectors, distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for "flying leads" (plug/socket).

❶ Strip length, outer insulation: 2-pole = 32 mm, 3-pole = 40 mm, 4- and 5-pole = 45 mm

PUSH-IN CAGE CLAMP®

1

Push down strain relief clamp by hand.

Push down strain relief clamp via 2.5 mm screwdriver alternately on both sides.

Latch the top of the strain relief housing.

The printed marking of the connector is clearly visible in the openings of the strain relief housing.

Connector with shield termination

Apply the shield to the rubber cable.
Strip length, outer insulation = 40 mm
Shield length = 8 mm

Push the shield connecting plate into the connector until fully inserted.

First insert the wired connector into strain relief housing, then snap clamp and cover.

WINSTA® MINI □ Coding: B □ 890, 891 Series

Description and Installation

1

Gray, B-coded connector with "3 2 1" marking, e.g., control signal (A circuit)

Easy circuit identification via different marking and colors

B-coded connectors (shown in gray) not only differ in color, but also in their design, making them incompatible with other coded connectors.

Light green, B-coded connector with "3 2 1" marking, e.g., DC power supply (24 V circuit)

Pink, B-coded connector with "3 2 1" marking, e.g., control signal (B circuit)

B-coded connectors with different colors can be plugged together.

Important note:

Different colors and/or pole markings are used for circuit identification.

Only connectors of the same color and same pole marking must be plugged together.

Pluggable connectors ► WINSTA® MINI ► 890 Series

Pole number: 2

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology for direct termination of solid conductors
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Snap-in device connector ► WINSTA® MINI ► 890 Series

Pole number: 2

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Electrical data			
Coding	A; B; I		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Nominal voltage	250 V	-	-
Rated surge voltage	4 kV	-	-
Rated current	16 A	-	-

Connection data	
Connection technology	Push-in CAGE CLAMP®
Strip length	9 mm / 0.35 inches
Nominal cross-section	1.5 mm² / 16 AWG
Solid conductor	0.25 ... 1.5 mm² / 22 ... 16 AWG
Solid conductor; push-in termination	0.75 ... 1.5 mm² / 20 ... 16 AWG
Stranded conductor	0.25 ... 1 mm² / 22 ... 18 AWG
Fine-stranded conductor	0.25 ... 1.5 mm² / 22 ... 16 AWG
Fine-stranded conductor; with insulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG
Fine-stranded conductor; with ferrule; push-in termination	0.75 mm² / 20 AWG

Material data	
Insulation material (main housing)	Polyamide (PA66)
Flammability class per UL94	V0
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data	
Number of mating cycles	200, without resistive load
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cut-outs. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Pole number: 3

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Fine-stranded conductor; with uninsulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG					
Fine-stranded conductor; with ferrule; push-in termination	0.75 mm² / 20 AWG					
Material data						
Material group	I					
Insulation material (main housing)	Polyamide (PA66)					
Flammability class per UL94	V0					
Clamping spring material	Chrome-nickel spring steel (CrNi)					
Contact material	Copper or copper alloy; surface-treated					
Contact Plating	Tin					
Mechanical data						
Number of mating cycles	200, without resistive load					
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)					
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)					
Retention force of a plug-in connection	Locked: > 80 N					
Environmental requirements						
Processing temperature	-5 ... +40 °C					
Continuous operating temperature	-35 ... +85 °C					
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C					

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cut-outs. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- a.) plugging different numbers of poles
- b.) plugging while rotated 180
- c.) plugging while laterally staggered
- d.) plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Rated current (note)				13 A for 3-pole load		
Material data						
Material group	I					
Insulation material (main housing)	Polyamide (PA66)					
Flammability class per UL94	V0					
Clamping spring material	Chrome-nickel spring steel (CrNi)					
Contact material	Copper or copper alloy; surface-treated					
Contact Plating	Tin					
Mechanical data						
Solder pin arrangement	2 in-line solder pins/pole					
Number of solder pins per potential	2					
Solder pin length	3.5 mm					
Solder pin dimensions	1 x 0.8 mm					
Drilled hole diameter with tolerance	1.3 ^(+0.1) mm					
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)					
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)					
Retention force of a plug-in connection	Locked: > 80 N					
Environmental requirements						
Processing temperature	-5 ... +40 °C					
Continuous operating temperature	-35 ... +85 °C					
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C					

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Pluggable connectors ► WINSTA® MINI ► 890 Series

Pole number: 4

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Fine-stranded conductor; with uninsulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG					
Fine-stranded conductor; with ferrule; push-in termination	0.75 mm² / 20 AWG					
Material data						
Material group	I					
Insulation material (main housing)	Polyamide (PA66)					
Flammability class per UL94	V0					
Clamping spring material	Chrome-nickel spring steel (CrNi)					
Contact material	Copper or copper alloy; surface-treated					
Contact Plating	Tin					
Mechanical data						
Number of mating cycles	200, without resistive load					
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)					
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)					
Retention force of a plug-in connection	Locked: > 80 N					
Environmental requirements						
Processing temperature	-5 ... +40 °C					
Continuous operating temperature	-35 ... +85 °C					
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C					

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Snap-in device connector ► WINSTA® MINI ► 890 Series

Pole number: 4

1

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Plate thickness: 0.5 ... 2 mm
Cutout tolerance: + 0.1 mm

Please note!

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cutouts. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- a.) plugging different numbers of poles
- b.) plugging while rotated 180
- c.) plugging while laterally staggered
- d.) plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Material data	
Insulation material (main housing)	Polyamide (PA66)
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data	
Number of mating cycles	200, without resistive load
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Pluggable connectors ► WINSTA® MINI ► 890 Series

Pole number: 5

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Connection technology	Push-in CAGE CLAMP®								
Strip length	9 mm / 0.35 inches								
Nominal cross-section	1.5 mm² / 16 AWG								
Solid conductor	0.25 ... 1.5 mm² / 22 ... 16 AWG								
Solid conductor; push-in termination	0.75 ... 1.5 mm² / 20 ... 16 AWG								
Stranded conductor	0.25 ... 1 mm² / 22 ... 18 AWG								
Fine-stranded conductor	0.25 ... 1.5 mm² / 22 ... 16 AWG								
Fine-stranded conductor; with insulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG								
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 0.75 mm² / 22 ... 20 AWG								
Fine-stranded conductor; with ferrule; push-in termination	0.75 mm² / 20 AWG								
Material data									
Material group	I								
Insulation material (main housing)	Polyamide (PA66)								
Flammability class per UL94	V0								
Clamping spring material	Chrome-nickel spring steel (CrNi)								
Contact material	Copper or copper alloy; surface-treated								
Contact Plating	Tin								
Mechanical data									
Number of mating cycles	200, without resistive load								
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)								
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)								
Retention force of a plug-in connection	Locked: > 80 N								
Environmental requirements									
Processing temperature	-5 ... +40 °C								
Continuous operating temperature	-35 ... +85 °C								
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C								

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Snap-in device connector ► WINSTA® MINI ► 890 Series

Pole number: 5

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Low profile with 4.4 mm pole spacing
- When assembled, the installation connectors comply with IP40 and are suitable for easily accessible areas.

Plate thickness: 0.5 ... 2 mm
Cutout tolerance: + 0.1 mm

Please note!

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cutouts. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- a.) plugging different numbers of poles
- b.) plugging while rotated 180
- c.) plugging while laterally staggered
- d.) plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Rated current (note)				13 A for 3-pole load 10 A for 4- and 5-pole load					
Material data									
Material group	I								
Insulation material (main housing)	Polyamide (PA66)								
Flammability class per UL94	V0								
Clamping spring material	Chrome-nickel spring steel (CrNi)								
Contact material	Copper or copper alloy; surface-treated								
Contact Plating	Tin								
Mechanical data									
Solder pin arrangement	2 in-line solder pins/pole								
Number of solder pins per potential	2								
Solder pin length	3.5 mm								
Solder pin dimensions	1 x 0.8 mm								
Drilled hole diameter with tolerance	1.3 ^(+0.1) mm								
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)								
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)								
Retention force of a plug-in connection	Locked: > 80 N								
Environmental requirements									
Processing temperature	-5 ... +40 °C								
Continuous operating temperature	-35 ... +85 °C								
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C								

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

WAGO Pluggable Connection System *WINSTA*® MIDI

WAGO Pluggable Connection System WINSTA® MIDI ▶ 770, 771 Series

4 mm² / 25 A

Note:

- Installation connectors are designed for connection and disconnection while not under load.
- There is no hazard-inducing interchangeability with systems based on IEC 60309, IEC 60320, IEC 60906 and with national connector and socket systems.
- Compliance with the standards (IEC 61535) does not guarantee hazard-preventing, non-interchangeability with installation connector systems from various manufacturers.
- Installation connector systems are not a substitute for residential connector/socket systems.
- B-Coded components from the WINSTA® MIDI series are designed for specialty applications (e.g., measurement, control and regulation technology) and certified per DIN EN 61984.
- WINSTA® MIDI Connectors are not intended for installation in open or easily accessible areas.

WINSTA® MIDI ▶ 770, 771 Series Installation

2

We recommend pulling the pre-latched strain relief housing over the cable prior to termination. However, the strain relief can be mounted at a later time as well.

1. Strip length, outer insulation = x mm ❶
2. Strip length = 9 mm
3. Extended ground conductor = 8 mm

To terminate fine-stranded conductors, open the clamping unit via screwdriver (2.5 mm blade width) and insert a stripped conductor until it hits backstop.

Insert the stripped solid conductor until it hits backstop.

To terminate fine-stranded conductors, open the clamping unit via screwdriver (2.5 mm blade width) and insert a stripped conductor until it hits backstop.

To remove the conductor, actuate the clamp via screwdriver (2.5 mm blade width) and pull out the conductor.

Latch the strain relief housing on the plug/socket. Note the "TOP" inscription.

Prepare strain relief housing by snapping together upper and bottom part.

Tighten strain relief screw via screwdriver (2.5 mm blade width).

Simply cut off the coding pin from the socket.

Insert coding pin into plug (break first) until it engages.

Marking strain relief housing via WSB Quick Marking System.

❶ Strip length, outer insulation: 2-pole = 35 mm, 3- to 5-pole = 55 mm

Connector with shield termination

the light connection system

2

Apply the shield to the rubber cable.
Strip length, outer insulation = 55 mm
Shield length = 10 mm

Connecting a T-connector to a 294 Series lighting connector.

Align the T-connector with the square cutouts.

Push the shield connecting plate into the connector until fully inserted.

Move the T-connector toward the square cutouts until it is locked in position.

First insert the wired connector into strain relief housing, then snap cover and tighten screw.

Push down until fully engaged – done!

WINSTA® MIDI ► Coding: B ► 770, 771 Series

Description and Installation

Gray, B-coded connector with "3 2 1" marking, e.g., control signal (A circuit)

Easy circuit identification via different marking and colors

B-coded connectors (shown in gray) not only differ in color, but also in their design, making them incompatible with other coded connectors.

Light green, B-coded connector with "3 2 1" marking, e.g., DC power supply (24 V circuit)

Pink, B-coded connector with "3 2 1" marking, e.g., control signal (B circuit)

B-coded connectors with different colors can be plugged together.

Important note:

Different colors and/or pole markings are used for circuit identification.

Only connectors of the same color and same pole marking must be plugged together.

WINSTA® MIDI ▶ 770, 771 Series
Marking

Labeling strain relief housings (770 Series) via marking strips (Item No. 210-333)

Labeling strain relief housings (771 Series) via marking strips (Item No. 210-334)

Labeling strain relief housings via WSB Quick Marking System.

2

Cable assembly with marker for custom labeling

Distribution connector with custom labeled cables

Colored markers for extra visual identification of cable assemblies on a WINSTA® Distribution Box

Pluggable connectors ► WINSTA® MIDI ► 770 Series

Pole number: 2 ► Number of connection points: 2 ► Protection type: IP20

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit
- Two-wire connection per pole for loops or bridges

Electrical data				
Coding	A; B; I; L			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	25 A	-	-	
Connection data				
Connection technology	Push-in CAGE CLAMP®			
Strip length	9 mm / 0.35 inches			
Nominal cross-section	4 mm² / 12 AWG			
Solid conductor	0.5 ... 4 mm² / 20 ... 12 AWG			
Solid conductor; push-in termination	1.5 ... 4 mm² / 16 ... 12 AWG			
Stranded conductor	0.5 ... 2.5 mm² / 20 ... 14 AWG			
Fine-stranded conductor	0.5 ... 4 mm² / 20 ... 12 AWG			
Fine-stranded conductor; with insulated ferrule	0.25 ... 1.5 mm² / 20 ... 16 AWG			
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 2.5 mm² / 20 ... 14 AWG			
Fine-stranded conductor; with ferrule; push-in termination	1.5 mm² / 16 AWG			
Material data				
Material group	I			
Insulation material (main housing)	Polyamide (PA66)			
Flammability class per UL94	V0			
Clamping spring material	Chrome-nickel spring steel (CrNi)			
Contact material	Copper or copper alloy; surface-treated			
Contact Plating	Tin			
Mechanical data				
Number of mating cycles	200, without resistive load			
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)			
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)			
Retention force of a plug-in connection	Locked: > 80 N			
Protection type	IP20			
Note on protection type	When mated and secured with a strain relief housing: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)			
Environmental requirements				
Processing temperature	-5 ... +40 °C			
Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C			

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

- Protected against mismatching and maintenance-free

Electrical data				
Coding	I; L; A; B			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	25 A	-	-	
Material data				
Insulation material (main housing)	Polyamide (PA66)			
Flammability class per UL94	V0			
Contact material	Copper or copper alloy; surface-treated			
Contact Plating	Tin			
Mechanical data				
Number of mating cycles	200, without resistive load			
Mating force of a plug-in connection	Approx. 20 ... 70 N (depending on pole number)			
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)			
Retention force of a plug-in connection	When locked: > 80 N			
Protection type	IP20			
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)			
Number of inputs	1			
Environmental requirements				
Processing temperature	-5 ... +40 °C			
Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C			

Note:

All WINSTA® components are 100% protected against mismatching when:

- a.) plugging different numbers of poles
- b.) plugging while rotated 180°
- c.) plugging while laterally staggered
- d.) plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Pluggable connectors ► WINSTA® MIDI ► 770 Series

Pole number: 3 ► Number of connection points: 2

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Two wire connections per pole for loops or bridges
- Additional variable coding is possible.

Electrical data				
Coding	A; B; P; R; S			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	25 A	-	-	
Connection data				
Connection technology	Push-in CAGE CLAMP®			
Strip length	9 mm / 0.35 inches			
Nominal cross-section	4 mm² / 12 AWG			
Solid conductor	0.5 ... 4 mm² / 20 ... 12 AWG			
Solid conductor; push-in termination	1.5 ... 4 mm² / 16 ... 12 AWG			
Stranded conductor	0.5 ... 2.5 mm² / 20 ... 14 AWG			
Fine-stranded conductor	0.5 ... 4 mm² / 20 ... 12 AWG			
Fine-stranded conductor; with insulated ferrule	0.25 ... 1.5 mm² / 20 ... 16 AWG			
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 2.5 mm² / 20 ... 14 AWG			
Fine-stranded conductor; with ferrule; push-in termination	1.5 mm² / 16 AWG			
Material data				
Insulation material (main housing)	Polyamide (PA66)			
Clamping spring material	Chrome-nickel spring steel (CrNi)			
Contact material	Copper or copper alloy; surface-treated			
Contact Plating	Tin			
Mechanical data				
Number of mating cycles	200, without resistive load			
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)			
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)			
Retention force of a plug-in connection	Locked: > 80 N			
Environmental requirements				
Processing temperature	-5 ... +40 °C			
Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C			

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Snap-in device connector ► WINSTA® MIDI ► 770 Series

Pole number: 3 ► Number of connection points: 2 ► Protection type: IP20

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Two wire connections per pole for loops or bridges
- Additional variable coding is possible.

Plate thickness: 0.5 ... 2 mm
Cutout tolerance: + 0.1 mm

Please note!

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cut-outs. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Electrical data				
Coding	A; B; P; R; S			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	25 A	-	-	

Connection data	
Connection technology	Push-in CAGE CLAMP®
Strip length	9 mm / 0.35 inches
Nominal cross-section	4 mm² / 12 AWG
Solid conductor	0.5 ... 4 mm² / 20 ... 12 AWG
Solid conductor; push-in termination	1.5 ... 4 mm² / 16 ... 12 AWG
Stranded conductor	0.5 ... 2.5 mm² / 20 ... 14 AWG
Fine-stranded conductor	0.5 ... 4 mm² / 20 ... 12 AWG
Fine-stranded conductor; with insulated ferrule	0.25 ... 1.5 mm² / 20 ... 16 AWG
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 2.5 mm² / 20 ... 14 AWG
Fine-stranded conductor; with ferrule; push-in termination	1.5 mm² / 16 AWG

Material data	
Insulation material (main housing)	Polyamide (PA66)
Flammability class per UL94	V0
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data	
Number of mating cycles	200, without resistive load
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Protection type	IP20
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Pole number: 3

- Protected against mismatching and maintenance-free
- Additional variable coding is possible.

Electrical data				
Coding	A; B; R; P			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	25 A	-	-	
Material data				
Contact material	Copper or copper alloy; surface-treated			
Contact Plating	Tin			
Mechanical data				
Number of mating cycles	200, without resistive load			
Mating force of a plug-in connection	Approx. 20 ... 70 N (depending on pole number)			
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)			
Retention force of a plug-in connection	When locked: > 80 N			
Protection type	IP20			
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)			
Number of inputs	1			
Environmental requirements				
Processing temperature	-5 ... +40 °C			
Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C			

Note:

At least one snap-in connector **WITHOUT** a locking lever is required on one side when connecting two lights directly via intermediate coupler.

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Pluggable connectors ► WINSTA® MIDI ► 770 Series

Pole number: 4 ► Number of connection points: 2 ► Protection type: IP20

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Two wire connections per pole for loops or bridges
- Additional variable coding is possible.

Flammability class per UL94	V0
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data	
Number of mating cycles	200, without resistive load
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Protection type	IP20
Note on protection type	When mated and secured with a strain relief housing: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Snap-in device connector ► WINSTA® MIDI ► 770 Series

Pole number: 4 ► Number of connection points: 2 ► Protection type: IP20

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Two wire connections per pole for loops or bridges
- Additional variable coding is possible.

Plate thickness: 0.5 ... 2 mm
Cutout tolerance: + 0.1 mm

Please note!

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cut-outs. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Electrical data						
Coding	A			B		
Ratings per	IEC/EN 60664-1			IEC/EN 60664-1		
Overvoltage category	III	III	II	III	III	II
Pollution degree	3	2	2	3	2	2
Nominal voltage	400 V	-	-	400 V	-	-
Rated surge voltage	6 kV	-	-	6 kV	-	-
Rated current	25 A	-	-	25 A	-	-
Rated current (note)				25 A for 3-pole load 20 A for 4-pole load		
Material data						
Insulation material (main housing)	Polyamide (PA66)					
Flammability class per UL94	V0					
Contact material	Copper or copper alloy; surface-treated					
Contact Plating	Tin					
Mechanical data						
Number of mating cycles	200, without resistive load					
Mating force of a plug-in connection	Approx. 20 ... 70 N (depending on pole number)					
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)					
Retention force of a plug-in connection	When locked: > 80 N					
Protection type	IP20					
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)					
Number of inputs	1					
Environmental requirements						
Processing temperature	-5 ... +40 °C					
Continuous operating temperature	-35 ... +85 °C					
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C					

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Connection data	
Connection technology	Push-in CAGE CLAMP®
Strip length	9 mm / 0.35 inches
Nominal cross-section	4 mm² / 12 AWG
Solid conductor	0.5 ... 4 mm² / 20 ... 12 AWG
Solid conductor; push-in termination	1.5 ... 4 mm² / 16 ... 12 AWG
Stranded conductor	0.5 ... 2.5 mm² / 20 ... 14 AWG
Fine-stranded conductor	0.5 ... 4 mm² / 20 ... 12 AWG
Fine-stranded conductor; with insulated ferrule	0.25 ... 1.5 mm² / 20 ... 16 AWG
Fine-stranded conductor; with uninsulated ferrule	0.25 ... 2.5 mm² / 20 ... 14 AWG
Fine-stranded conductor; with ferrule; push-in termination	1.5 mm² / 16 AWG

Material data	
Material group	I
Insulation material (main housing)	Polyamide (PA66)
Flammability class per UL94	V0
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data	
Number of mating cycles	200, without resistive load
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Protection type	IP20
Note on protection type	When mated and secured with a strain relief housing: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Snap-in device connector ► WINSTA® MIDI ► 770 Series

Pole number: 5 ► Number of connection points 2 ► Protection type: IP20

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Two wire connections per pole for loops or bridges
- Additional variable coding is possible.

Plate thickness: 0.5 ... 2 mm
Cutout tolerance: + 0.1 mm

Please note!

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cutouts. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Protection type	IP20
Note on protection type	When mated: IP20xC (These compact connectors are not designed for use in open, easily accessible areas!)

Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Rated surge voltage	6 kV	-	-	6 kV	-	-
Rated current	25 A	-	-	25 A	-	-
Rated current (note)				25 A for 3-pole load 20 A for 4- and 5-pole load		
Material data						
Insulation material (main housing)	Polyamide (PA66)					
Flammability class per UL94	V0					
Clamping spring material	Chrome-nickel spring steel (CrNi)					
Contact material	Copper or copper alloy; surface-treated					
Contact Plating	Tin					
Mechanical data						
Solder pin arrangement	2 in-line solder pins/pole					
Number of solder pins per potential	2					
Solder pin length	3.5 mm					
Solder pin dimensions	1 x 0.8 mm					
Drilled hole diameter with tolerance	1.5 (-0.1 ... +0.1) mm					
Number of mating cycles	200, without resistive load					
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)					
Unmating force of a plug-in connection	Unlocked: approx. 20 ... 70 N (depending on pole number)					
Retention force of a plug-in connection	Locked: > 80 N					
Environmental requirements						
Processing temperature	-5 ... +40 °C					
Continuous operating temperature	-35 ... +85 °C					
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C					

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180°
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

Distribution connector ► WINSTA® MIDI ► 770 Series

Pole number: 5

Three-phase to single-phase distribution connector ► Number of locking levers: 6

Movable jumper

Jumper pushed down, flush with the housing (position L1)

Additional h-distribution connectors double L1 and L3.
This results in the following connection option:
L1/L1/L2/L2/L3/L3 with jumper in position L2
Notice: h-distribution connectors can only be plugged on L1 and L3.

Material data									
Insulation material (main housing)	Polyamide (PA66)								
Contact material	Copper or copper alloy; surface-treated								
Contact Plating	Tin								
Fire class per EN 50575	E _{ca}								
Mechanical data									
Number of mating cycles	200, without resistive load								
Mating force of a plug-in connection	approx. 20 ... 70 N (depending on pole number)								
Unmating force of a plug-in connection	when unlocked: approx. 20 ... 70 N (depending on pole number)								
Retention force of a plug-in connection	when locked: > 80N								
Protection type	IP20								
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)								
Environmental requirements									
Processing temperature	-5 ... +40 °C								
Continuous operating temperature	-35 ... +85 °C								
Note on continuous operating temperature	Cable for temperatures ≤ 70 °C (including halogen-free) Insulating parts for temperatures ≤ 105 °C								

Note:

Cables with a different fire class can be found in the eS-hop.

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

WAGO Pluggable Connection System *WINSTA*® MAXI

WAGO Pluggable Connection System WINSTA® MAXI ▶ 831 Series

6 mm² / 35 A

- Note:
- Installation connectors are designed for connection and disconnection while not under load.

- There is no hazard-inducing interchangeability with systems based on IEC 60309, IEC 60320, IEC 60906 and with national connector and socket systems.

- Compliance with the standards (IEC 61535) does not guarantee hazard-preventing, non-interchangeability with installation connector systems from various manufacturers.

- Installation connector systems are not a substitute for residential connector/socket systems.

- WINSTA® MAXI Connectors are not intended for installation in open or easily accessible areas.

Pluggable Connectors; 831 Series

5-pole

278

WINSTA® MAXI ▶ 831 Series

Description and Installation

The following lengths are recommended:

1. Strip length, outer insulation = 80 mm
2. Strip length = 13 mm
3. Extended ground conductor = 10 mm

To terminate fine-stranded conductors, open the clamping unit via screwdriver (5.5 mm blade width) and insert a stripped conductor until it hits backstop.

The printed marking of the connector is clearly visible in the openings of the strain relief housing.

3

Unscrew base of strain relief housing.

Snap wired connector onto the base.

Tighten strain relief using a screwdriver.

Wired connector fitted in base of strain relief housing.

Latch the top of the strain relief housing.

Pluggable connectors ► WINSTA® MAXI ► 831 Series

Pole number: 5

- Protected against mismatching and maintenance-free
- Push-in CAGE CLAMP® spring pressure connection technology allows solid conductors to be simply pushed into a unit.
- Minimize voltage drop over longer cable runs.

Electrical data

Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Nominal voltage	400 V	-	-
Rated surge voltage	6 kV	-	-
Rated current	35 A	-	-

Connection data

Connection technology	Push-in CAGE CLAMP®
Strip length	13 mm / 0.51 inches
Nominal cross-section	6 mm² / 8 AWG
Solid conductor	0.5 ... 6 mm² / 20 ... 8 AWG
Stranded conductor	0.5 ... 4 mm² / 20 ... 12 AWG
Fine-stranded conductor	0.5 ... 6 mm² / 20 ... 8 AWG
Fine-stranded conductor; with insulated ferrule	0.5 ... 6 mm²
Fine-stranded conductor; with uninsulated ferrule	0.5 ... 6 mm²

Material data

Material group	I
Insulation material (main housing)	Polyamide (PA66)
Flammability class per UL94	V0
Clamping spring material	Chrome-nickel spring steel (CrNi)
Contact material	Copper or copper alloy; surface-treated
Contact Plating	Tin

Mechanical data

Number of mating cycles	100, without resistive load
Mating force of a plug-in connection	approx. 30 ... 70 N (depending on number of poles)
Unmating force of a plug-in connection	Unlocked: approx. 30 ... 70 N (depending on pole number)
Retention force of a plug-in connection	Locked: > 80 N
Protection type	IP20
Note on protection type	When mated and secured with a strain relief housing: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)

Environmental requirements

Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Note:

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

See technical section for further information

- For round conduits and ducts
- 3- and 4-pole pre-assembled cables with 17.5 mm (0.689 inch) outer diameter for easy plug & play
- Plug-in integration into the electrical installations of hollow-wall boxes via adapter, for example

Electrical data				
Coding	A			
Ratings per	IEC/EN 60664-1			
Overvoltage category	III	III	II	
Pollution degree	3	2	2	
Nominal voltage	250 V	-	-	
Rated surge voltage	4 kV	-	-	
Rated current	16 A	-	-	
Material data				
Insulation material (main housing)	Polyamide (PA66)			
Contact material	Copper or copper alloy; surface-treated			
Contact Plating	Tin			
Fire class per EN 50575	E _{ca}			
Mechanical data				
Number of mating cycles	200, without resistive load			
Mating force of a plug-in connection	Approx. 30 ... 70 N (depending on pole number)			
Unmating force of a plug-in connection	Unlocked: approx. 30 ... 70 N (depending on pole number)			
Retention force of a plug-in connection	when locked: > 80N			
Protection type	IP20			
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)			
Environmental requirements				
Processing temperature	-5 ... +40 °C			
Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Cable for temperatures ≤ 70 °C (including halogen-free) Insulating parts for temperatures ≤ 105 °C			

Note:

Cables with a different fire class can be found in the eShop.

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while incorrectly rotated
- plugging while laterally staggered

WAGO Pluggable Connection System *WINSTA*® KNX

WAGO Pluggable Connection System WINSTA® KNX ▶ 893, 894 Series

Ø 0.8 mm / 3 A

- Note:
- Installation connectors are designed for connection and disconnection while not under load.

- There is no hazard-inducing interchangeability with systems based on IEC 60309, IEC 60320, IEC 60906 and with national connector and socket systems.

- Installation connector systems are not a substitute for residential connector/socket systems.

- WINSTA® KNX Connectors are not intended for installation in open or easily accessible areas.

WINSTA® KNX ▶ 893, 894 Series

Description and Installation

1. Strip length, outer insulation = 23 mm
2. Strip length = 9 mm

Prior to termination, pull the strain relief housing over the cable.

Insert stripped conductors directly into the conductor entries.

Push conductors until they hit backstop.

To disconnect, open clamping unit using the actuator and pull out the conductor.

Snap wired connector into the strain relief housing.

Press strain relief firmly on the cable.

Pre-assembled KNX connector

Pluggable connectors ► WINSTA® KNX ► 893 Series

Pole number: 2

- For low voltages up to 50 V
- Compact size, standardized interface
- Available in two different custom coding options with protection against mismatching

Dimensions in mm

Overall length when mated

Continuous operating temperature	-35 ... +85 °C			
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C			

Note:

The snap-in connectors must be relieved of tensile and transverse forces.

A surface finish can influence the edge radius of the cutouts. This may affect the snap-in socket fit, so ensure an adequate fit before use. In addition, the punched edge should be on the inside for punched cutouts.

The wings of the snap-in connectors must not be mechanically stressed for a long period before use (e.g., due to a pre-locking position).

All WINSTA® components are 100% protected against mismatching when:

- plugging different numbers of poles
- plugging while rotated 180
- plugging while laterally staggered
- plugging one pole

- c.) plugging while laterally staggered
- d.) plugging one pole

All connectors for mounted installations (snap-in versions for lighting fixtures or devices, all types of PCB and distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for flying leads (plug/socket).

WAGO Pluggable Connection System

WINSTA® IDC

Important note:

The *WINSTA*® IDC system consists of the flat cables and the appropriate *WINSTA*® connection components that are described in this catalog and marked with "Woertz."

WAGO warrants the fault-free function of the *WINSTA*® IDC system only where original components are utilized.

Notice:

Only use identically coded supply and tap-off modules on the same cable!

- A- and P-coding (N ⊕ L1 L2 L3) are designed for a 400 V three-phase current cable configuration.
- I-coding (N ⊕ L DA- DA+) is designed for up to 230 V and dimming cable configurations.
- B-coding (N ⊕ L1 L2 L3) is designed for custom cable configurations.

Only modules with the same pole marking shall be used within an application.

WAGO Pluggable Connection System WINSTA® IDC ► 772, 893, 895, 896 Series for Flat Cables up to 16 mm²

- Note:
- Installation connectors are designed for connection and disconnection while not under load.
 - There is no hazard-inducing interchangeability with systems based on IEC 60309, IEC 60320, IEC 60906 and with national connector and socket systems.
 - Installation connector systems are not a substitute for residential connector/socket systems.
 - WINSTA® IDC Connectors are not intended for installation in open or easily accessible areas.

WINSTA® IDC ▶ 772 Series Installation

Insert flat cable into base (observe coding!).

Mount IDC module flush with the base.
Should the IDC module jam during mounting, turn the upper part by 180° and remount it.

Screw down contact elements until element stops.

The mounting plate can be centrally mounted, or attached via outboard attachment points using 770-601 Mounting Pins.

Snapping a supply or tap-off module onto a mounting plate.

The phase selector is in position L2 (center) when delivered.

Move the phase selector into position L1 or L3 if required.

After connecting the flat cable, the IDC module is locked and can no longer be moved, even after unscrewing the contact element.

Connecting an installation cable to the supply module: Simply push stripped, solid conductors into unit. Open clamp via screwdriver to insert stripped, fine-stranded conductors.

Secure supply cable via strain relief housing.

Tighten strain relief screw using a screwdriver.

Tighten the screws to connect the flat cable. Observe 1 Nm of tightening torque!

Snap the transparent protective cover onto the module.

Notice: Should it be necessary to tap another phase, this must be done in a different location. To do so, the contact elements must be unscrewed and brought back to their original position.

Lift contact element to unlock phase selector and select the new phase.
Notice: Do not reuse in the same location of the flat cable.

Use insulating tape to seal the contact holes in the flat cable after removing a module.

Supply/tap-off module ► WINSTA® IDC ► 772 Series

for flat cable 5 x 2.5 mm², 5 x 4 mm², 5 x 2.5 mm² + 2 x 1.5 mm²

- Suitable for bus and power lines or for bus and power combined in one cable
- Easy installation without cable interruption thanks to convenient insulation displacement connection (IDC) technology
- WINSTA® IDC Supply and Tap-Off Modules allow connection at any point along the flat cable – one rotation per pole is all that is required

	Distribution Box for Self-Assembly 365

WINSTA® Boxes ► 899 Series

System Description and Installation

The set includes: 1 bottom, 1 lid, 2 sidewalls and 16 mounting pins.

Remove unrequired areas from the sidewalls.

Unassigned slots and spaces are closed by inserting a sidewall.

Using mounting pins to secure WINSTA® MIDI connectors in a distribution box.

Using adapters to install WINSTA® MINI connectors in a distribution box.

Securing the mounting plate with WINSTA® Box to the wall (e.g., via stud gun).

Custom-made WINSTA® Box

WINSTA® Boxes ▶ 899 Series

General Data

Material Data	
Insulation material	Polyamide (PA66)
Flammability class per UL94	V0
Contact material	Copper or copper alloy; surface-treated
Contact plating	Tin
Mechanical Data	
Protection type	IP20
Note on protection type	When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)
Environmental requirements	
Processing temperature	-5 ... +40 °C
Continuous operating temperature	-35 ... +85 °C
Note on continuous operating temperature	Insulating parts for temperatures ≤ 105 °C

Accessories

Mounting plate; for distribution boxes

Color	Item no.	PU

Supply cable entry

Number of outputs: 8 ▶ Coding: B

899-631/454-000

Description

Power supply is performed via 10-pole terminal strip.

Application example:
Valves control

Includes: 1 cable clamp and 2 mounting screws

Color	Item No.	PU
● black	899-631/454-000	1

Electrical data

Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Nominal voltage	250 V	-	-
Rated surge voltage	4 kV	-	-
Rated current	6 A	-	-

Connection data

Locking lever; for flying leads; tool operated

Color	Item No.	PU (SPU)
black	890-111	100(50)
white	890-131	100(50)

All connectors for mounted installations (snap-in versions, pluggable PCB connectors, distribution connectors) are factory-equipped with locking levers to ensure plugs and sockets are securely locked. Additional locking levers are only required for "flying leads" (plug/socket).

Locking connector via integrated lever.
Locking second connector for a secure connection.

Seal unused cutout with lockout cap.

	206-1128 1

Spare stripping stop	
	206-1129 1

Spare cut protector	
	206-1131 1

Spare clamping jaws	
	206-1132 1

Partially stripping a conductor.

Cutting a conductor.

Wire Stripper:

- Automatically adjust to conductor size
- Stripping blades cause no damage to conductor strands
- Gripping pressure of jaws adjusts automatically to conductor insulation diameter
- Clamping jaws and stripping blades automatically open once the stripping process is completed – no splaying of the conductor strands
- Exact strip length may be set by sliding black setting stop
- Stripping blades can be replaced
- Self-sharpening, fully protected cutter (replaceable)
- Entire body made of glass-fiber-reinforced polyamide
- Cutting capacity of the wire cutter of fine-stranded conductors up to 16 mm² (6 AWG)

Cable Cutter, Stripping Knives ▶ WINSTA®

Cable cutter; with partially insulated handles; for 5 x 6 mm² flat cables		
Color	Item No.	PU
red	897-960	1

Stripping knife; for 5 x 10 mm² flat cable		
Color	Item No.	PU
light gray	897-951	1

Stripping knife; for 5 x 16 mm² flat cable		
Color	Item No.	PU
light gray	897-952	1

Cut both flat cable insulation sides via stripping knife.

Cable Cutter and Wiring Aid ► WINSTA®

Cable cutter; per VDE; for copper and aluminum cables; 0.25 ... 35 mm²		
Color	Item No.	PU (SPU)
green	206-118	10(1)

Cutting a cable.

Wiring aid; for 5-pole connectors; distribution connectors with phase selection and IDC supply modules; suitable for solid and stranded conductors		
Color	Item No.	PU (SPU)
orange	770-100	20(1)

Strip outer insulation, insert cable into the wiring aid and arrange the single conductors according to the marking, starting with N. Cut conductor ends to the proper length.

Strip conductor ends to a length of 9 mm (see marking). Slide connector to the stop over conductor ends.

Markers and Marking Strips ▶ WINSTA®

Marker; for manual marking		
Color	Item No.	PU
white	770-450	50

Important note:

B-Coded components within the WINSTA® MINI and WINSTA® MIDI families are designed for specialty applications (e.g., measurement, control and regulation technology) and certified per DIN EN 61984. In addition to the gray models rated from 110 to 400 V, there is now also a variant in light green for low voltages up to 48 V, as well as a pink one for bus applications.

Each of the three versions is available in 2-, 3- or 4- and 5-pole configurations. Pole marking can be printed at the factory to suit customer requirements. B-coded products are protected against mismatching with all other coding types found in the WINSTA® system. Within B-coding, all variants can mate with each other. The variable coding system provides clear circuit identification. All variants can be clearly differentiated according to color and pole marking. They can be coded on-site or delivered with factory-installed custom coding.

WINSTA® MINI and MIDI ▶ Coding: B

Pole Markings

Suffix Number	Marking				Application
	2-pole	3-pole	4-pole	5-pole

Distribution connectors and cable assemblies with above-mentioned pole markings are available upon request.

Item number example:

WINSTA® MIDI, plug, 4-pole, light green, with U- U+ DI AI pole marking 770-274/072-000

Operating WAGO Connection Technologies

Please follow the applicable product-specific termination instructions.

PUSH-IN CAGE CLAMP®

Push-in CAGE CLAMP® terminates the following copper conductors: solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

The universal connection with an additional advantage:

Push-in connection

Terminate solid and stranded (Class B 7 strands or less), as well as ferruled conductors, by simply pushing them in – no tools required.

Termination for all conductor types:

- Open clamping unit.
- Insert the conductor.
- Release clamp – done!

CAGE CLAMP®

CAGE CLAMP® terminates the following copper conductors: solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

The universal connection for solid, stranded and fine-stranded conductors

Termination:

- Open clamping unit.
- Insert the conductor.
- Release clamp – done!

Operating WAGO Connection Technologies

Please follow the applicable product-specific termination instructions.

POWER CAGE CLAMP®

POWER CAGE CLAMP terminates the following copper conductors: solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, with ferrule (gastight crimped)

The universal connection for conductors larger than 35 mm² (2 AWG)

Termination:

- Open clamp by turning a T-wrench counter-clockwise.
- Press the integrated latch to open clamping unit for hands-free wiring.
- Insert the conductor.
- A small counter-clockwise rotation closes the clamp, securing conductor.

PUSH WIRE®

PUSH WIRE® terminates the following copper conductors: solid

PUSH WIRE® connection for solid and stranded conductors (depending on the model used)

Termination:

Tool-free, twist-free terminations for solid and rigid stranded conductors – simply push into the unit.

WINSTA®

Electrical Engineering Laboratory

Product Safety for Our Customers

To use terminal blocks globally, they must satisfy certain standards and obtain test certificates. These requirements apply to every manufacturer. WAGO also conducts its own tests to increase standards and offer greater reliability with its products. Products undergo a full range of mechanical, electrical and climatic testing, and we'll share a few of those processes with you.

Pull-Out Test (per EN 60947-7-1, EN 60998-2-2)

During the pull-out force test, a conductor is pulled on until it is removed from the clamping unit. The design of the terminals means that extraction only occurs after the standard pull-out force has been exceeded many times over.

WAGO Test Lab

This means that WAGO's products can be used safely and reliably both in Europe and anywhere globally for a wide variety of applications. We heavily emphasize the importance of global acceptance during development. As a result, we can present documentation that verifies our high levels of product safety and reliability while ensuring the fulfillment and accuracy of technical data, which are the highest priorities for our customers and users worldwide. On December 22, 2009, our test lab was accredited by the German Accreditation Association (Deutsche Gesellschaft für Akkreditierung GmbH) in accordance with DIN EN ISO/IEC 17025.

Vibration Test (per IEC/EN 60068-2-6)

Depending on the application, such as railway (per EN 61373) or marine (per GL, LR, DNV), there are various testing requirements to determine if the long-term effects of vibrations degrade electrical connections. The test specimen is subjected to different loads on three axes in an electrodynamic vibration system. The amplitude, the acceleration, and particularly the frequency of the vibration vary during the test. The test values are increased many times over the standard values to meet special customer requirements.

Shock Test (per IEC/EN 60068-2-27)

The shock test is very similar to the vibration test except that, instead of continuous vibrations, single shocks are applied to the test specimen. Shock tests are usually performed, for example, at an acceleration of 20g over a period of 11 ms. Tests for special requirements often call for much higher values and are also conducted in our laboratory. Single-deck TOPJOB® S Rail-Mount Terminal Blocks, for example, pass shock tests up to 500g.

Voltage Drop Test under Bending Stress (per EN 60947-7-1, EN 60999-1)

The voltage drop test under bending stress simulates mechanical stress on the clamping unit. In everyday use, this stress can occur during installation, for example, when an electrician shoves connected conductors to the side in order to access a specific component. The quality of the clamping unit when moving a connected conductor can be validated by the constantly stable measured value of the voltage drop.

Deutsche Akkreditierungsstelle GmbH

Entrusted according to Section 8 subsection 1 AkkStelleG in connection with Section 1 subsection 1 AkkStelleGBV

Signatory to the Multilateral Agreements of EA, ILAC and IAF for Mutual Recognition

Accreditation

The Deutsche Akkreditierungsstelle GmbH attests that the testing laboratory

WAGO GmbH & Co. KG
Hansastraße 27, 32423 Minden

is competent under the terms of DIN EN ISO/IEC 17025:2018 to carry out tests in the following fields:

Electrical and mechanical testing of terminals and connectors and environmental simulation

The accreditation certificate shall only apply in connection with the notice of accreditation of 18.05.2022 with the accreditation number D-PL-19704-01. It comprises the cover sheet, the reverse side of the cover sheet and the following annex with a total of 9 pages.

Registration number of the certificate: **D-PL-19704-01-00**

Berlin,
29.06.2022

Florian Burkart
Head of Technical Unit

Translation issued:
29.06.2022

Head of Technical Unit

The certificate together with the annex reflects the status as indicated by the date of issue.

The current status of any given scope of accreditation can be found in the directory of accredited bodies maintained by Deutsche Akkreditierungsstelle GmbH at <https://www.dakks.de/en/accredited-bodies-search.html>.

This document is a translation. The definitive version is the original German accreditation certificate.

See notes overleaf.

WAGO Seminars

Learn Today – Benefit Tomorrow

Setting the Bar with Your Goals

Product-Related and Customer-Specific Seminars

Small Groups

The small class sizes of WAGO training seminars ensures that no question goes unanswered and no one is overlooked.

Teamwork

Learning as a group is very effective. Ideas can be discussed and exchanged while experiences can be shared – all for the benefit of the participants.

Practical Topics

Experience has shown that practice makes perfect. This is why the focus of every WAGO training seminar is on practical, hands-on learning.

WAGO Seminars

Experience the Benefits of First-Hand Knowledge and Expertise – Straight from the Source!

Our instructors are specialists who know all the ins and outs of WAGO's products. This ensures that the time devoted to each WAGO training seminar is an effective investment in expanding your own expertise.

Request your registration form by e-mail:

training@wago.com

**Contact your local
WAGO office.**

Product-Related Seminars

We regularly offer product-related seminars on the following topics:

- Building and industrial automation
- Programming of automation components
- Fieldbus systems

**Current seminars:
www.wago.com**

Customer-Specific Seminars

In addition to these "open" seminars, we also offer seminars specially tailored to your organization and its particular needs. that are specifically tailored to your organization.

Upon request, we can also conduct these seminars at your location.

**Special
corporate seminars**

Success for Generations: Environmental Protection at WAGO

At WAGO, we see environmental protection not only as compliance with environmental protection requirements.

As a growing company, our commitment to the environment drives our efforts to deliver new ideas, new concepts and new technologies along the product lifecycle. Here our employees and business partners support us.

Corporate environmental protection

Business growth also leads to higher consumption of resources. We have realized that the economic success of a company also depends on the achievement of environmental goals.

As a manufacturing company, we therefore support developments that make a contribution to environmental protection. In doing so, we always pursue individual material flows along the value chain, because we see resources, product design, production and consumption as a whole.

With our environmental management system certified in accordance with DIN EN ISO 14001, we ensure that the required national and international requirements are complied with in all areas of the company and that the concept of environmental protection is practiced in all corporate processes. In addition, WAGO is pursuing further efforts in the field of environmental protection that go far beyond the requirements of ISO

Some examples include the recycling of plastics, resource savings on product and packaging materials, the use of recycled paper throughout the company, the introduction of e-filling stations and the use of waste heat from production processes.

Product-related environmental protection

Product-related environmental protection is an important part of sustainable environmental management at WAGO. Ensuring compliance with substance bans / restrictions worldwide, such as: As REACH, RoHS has a high priority.

RoHS – Restriction of the use of certain Hazardous Substances

It is an EC directive that regulates the use of certain hazardous substances in electrical and electronic equipment. In addition to reducing the harmful effects on humans and the environment, legislation aims to improve recycling possibilities. WAGO closely monitors the development regarding RoHS and reacts promptly to specifications accordingly. For more information about RoHS please contact us via ehs-product-compliance@wago.com.

RoHS 
Compliant

Success for Generations: Environmental Protection at WAGO

REACH – Registration, Evaluation and Authorisation of Chemicals

On 01.06.2007 the regulation (EC) no. 1907/2006 (REACH regulation) came into force and since then forms a valid legal basis for all EU member states. To protect human health and the environment, this EU Chemicals Regulation aims to classify and identify all chemicals, including their effects.

The REACH Regulation creates specific obligations for each actor in the supply chain. The products manufactured by WAGO are to be designated as products in the sense of the regulation. Since products are not subject to registration, WAGO usually assumes the role of the downstream user in the supply chain. WAGO therefore has an obligation to provide information along the supply chain in accordance with REACH Article 33. WAGO is naturally aware of this obligation.

BOMcheck.net

For more information about our reporting requirements according to REACH Article 33 please visit our website "REACH SVHC Declaration" via www.wago.com/svhc

BOMcheck

European legislation such as REACH or RoHS requires the provision of information on restricted ingredients in products. This information must be shared by manufacturers and suppliers in the supply chain. WAGO meets this challenge in product-related environmental protection successfully and efficiently with BOMcheck.

BOMcheck is a centralized database for the declaration of ingredients. It is a compliance tool specifically designed to enable manufacturers and suppliers to produce their substance declarations under REACH, RoHS, and other restrictions on ingredients in an efficient and structured manner. This Internet database system increases data quality in the area of product-related environmental protection.

Further information on BOMcheck can be found at the following link: <http://www.bomcheck.net>

WEEE – Waste of Electrical and Electronic Equipment

The WEEE Directive 2012/19/EU regulates the take-back and recycling of electrical and electronic equipment. Manufacturers and importers of electrical and electronic equipment are obliged to register as a 'WEEE producer' and to comply with the reporting and take-back obligations. As a matter of course, we have taken compliance with legal WEEE requirements very seriously all the time - in our own interest as well as in the well-understood interest of our customers.

Only some of our products fall within the scope of the WEEE Directive and the Member State's implementation laws. These products are WEEE-compliant marked by us, as far as such a marking is legally required (which is not required for the B2B area Europe-wide).

For more information about WEEE please contact us via ehs-product-compliance@wago.com.

Less is more: our packaging

Recycling is the basis for choosing our packaging materials. All packaging used by WAGO can be recycled in the economic cycle without further pretreatment. In addition to the aspect of recycling, emphasis is placed on resource conservation. For this reason, our cardboard boxes consist of 80% recycled paper and are marked with the Resy symbol. The Resy symbol guarantees compliance with the Packaging Ordinance for transport packaging. The labeling is partly done by perforation. This process enables the colorless printing of WAGO cardboard boxes. This avoids unnecessary environmental pollution.
